

Bowling Machine Policy

The following safety guidelines must be followed:

- The coach will always have overall responsibility for the operation of the bowling machine
- All necessary regulations concerning the supply of electricity to the machine and the manufacturers' recommendations must be strictly adhered to.
- Batters must take the opportunity to observe several deliveries before taking strike
- During practice, no adjustments to the machine will be made without the batter being advised before receiving another delivery.
- Adjustments to the machine will only be made under the supervision of the coach
- The feeder will always ensure that the batter is ready and will indicate to them that they are about to feed the next delivery
- Balls should be inspected prior to use and rejected if worn or damaged.
- Do not increase the bowling speed above that which the individual batter can play with some degree of certainty
- When certain strokes are practiced, it is advisable for the feeder to have some form of physical protection
